

# Product Information

## Dimensionair air gages (single master system) Millimar D-1250

### Product features:

- Operated with regular workshop compressed air (40-125 psi)
- An internal pressure regulator keeps the measuring pressure within the calibrated range
- Zero offset of the instrument with just one setting standard and the zero adjuster
- Clear display with fine dial graduation and needle thin pointer gives an accurate, reliable readout
- An integrated air filter removes dust and dirt particles from the air supply
- Equipment connection on the front of the device; hand tightening is sufficient for tight connections
- No recalibration required after changing the measuring equipment; measurement can be resumed immediately after setting the instrument to zero
- 4 models available, choice of mm or inches

### Package contains:

- adapter for pneumatic plug gages, Federal compatible
- air filter
- supply hose AHO-2

Order-No.: **2095183**
